TARA SALEH

Full-Stack Engineer

Creative Coder

PROFILE

I am a full stack developer for mobile and web with a
background in various industries such as Business, Legal Consultancy
and Makeup Artistry. I found software development merging all three areas
of my interest and skill set involving creativity, logistics and analytics. I am
passionate about lifelong learning and solving puzzles which is how I
describe my development style.

PROFESSIONAL EXPERIENCE

FULL STACK SOFTWARE ENGINEER (web & mobile)/ *iContribute*
AUG 2021 - Present

- Write well designed, testable, efficient code by using the best software development practices.
- Provide detailed documentation and hand-off material and training to Marketers, Product Owners and Developers as necessary.
- Work closely with internal teams such as the design team to integrate
- Complete projects individually and collaboratively in an Agile environment
- Troubleshoot, debug and upgrade web applications.

OTHER PROJECTS

INNERTUNER App

- Utilized MERN stack to create an app to track and incorporate healthy habits.
- Created application with mobile-first approach and styled the application using Tailwind.
- used Mongoose to define schemas for MongoDb collections.

We Chat App

- Utilized Django and SQLite3 and socket.io for Python with full Create Read Update and Delete (CRUD) functionality to stimulate a chat platform where users can communicate in real time.
- Created application with mobile-first approach and styled the application using Materialize, HTML5 and CSS3.

City Collection

- Created an application utilizing Django framework, Python, MySQL and Post-bird allowing users to collect and display cities they have travelled to with full CRUD functionality.
- Styled the project with Bootstrap5 and CSS3

We Sell

- Created an E-commerce application utilizing Express framework.
- Making RESTful API fetch calls to an Express, MongoDB, Node.js backend handling all CRUD operations, and tested all backend routes during development using Postman.
- Used Mongoose to define schemas for MongoDB collections
